Tampa, Fla. – The health advisory that was issued for Bahia and Simmons Park beaches has been lifted. Follow-up testing was satisfactory, based on the marine water bacterial indicator results.

The initial sampling was performed August 7, and follow-up sampling was performed on August 14. The August 14 sampling revealed the health advisory should continue, therefore sampling took place again on August 21.

Visit the Florida Department of Health's Beach Water Quality website at <http://www.floridahealth.gov/environmental-health/beach-water-quality/index.html>. To review the beach water sampling results for reporting counties, click on a county name.
